ABOUT ME

Graphic design has been and will always be my continuously developing passion. Day-to-day I'm a Senior Graphic Designer in Marketing and PR Department at the largest Polish social media portal. Always on a top with the latest trends my daily routine I dedicate to self- development and creative areas exploration. The experience I systematically gain allows me to develop and build my individual activity in the IT and new media industry. As a freelancer I specialize in CI building and management as well as Internet solutions design (websites, advertising banners and many more).

Being at a swim and most up to date with the latest world trends in the industry I guarantee the highest quality of my work and individual approach to every single project. That personalized approach and my rich work experience, both professional and personal, has been already highly appreciated by the industry best: Designious-times- "Artist of the week" in 2011 and Snsrendipity: Art & Design Blog - "Graphic Design Inspiration Of The Day" to name a few.
